

Statement of Public Participation

Delivering and Protecting High Quality Environments in Fenland Supplementary Planning Document (SPD): Representations received during public consultation (14th January 2014 - 24th February 2014) and changes made to the SPD following consultation

Explanatory Note:

This report sets out a summary of the representations received during the consultation on the Draft 'Delivering and Protecting High Quality Environments in Fenland' SPD together with the Council's response to these comments. This is a public document, and helps Fenland District Council meet its commitment to consult and keep people informed of progress on planning policy documents that form part of the Fenland Planning Policy Framework.

This report also sets out changes made to the SPD which were necessary as a result of amendments made to the Local Plan (previously referred to as the Core Strategy) prior to its adoption in May 2014.

1. Introduction

- 1.1. Fenland District Council wishes to thank all those who took the time between 14th January 2014 and 24th February 2014 to comment on the draft 'Delivering and Protecting High Quality Environments in Fenland' SPD. The consultation on this SPD was carried out at the same time as the Proposed Modifications to the Local Plan (previously known as the Core Strategy).
- 1.2. The SPD has been prepared to support the Fenland Local Plan 2014, specifically Policy LP16 (formerly CS16), - 'Delivering and Protecting High Quality Environments across the District'. The SPD will help developers in preparing planning applications for submission to Fenland District Council and will also aid the Council in making informed decisions on relevant applications.
- 1.3. Policy LP16 'Delivering and Protecting High Quality Environments across the District' of the Local Plan is used as the starting point for this SPD. When adopted, the SPD will form part of the Council's planning policy framework, supplementing Policy LP16 of the Local Plan. The adopted SPD will have status as a material consideration in the determination of planning applications. The Local Plan policies will have the greatest 'weight' in legal terms when the Council determines planning applications. However, the Local Plan only sets the overarching policy approach to planning in Fenland; this SPD provides detailed guidance on how this policy will be implemented.

2. Compliance with National Guidance and Regulations

- 2.1. The SPD was prepared in accordance with national guidance, most notably the National Planning Policy Framework (NPPF) and The Town and Country Planning Regulations 2012. Regulation 12(b) and Regulation 13 require the Council to consult the public and stakeholders before adopting a SPD. The Council is required by Regulation 12(a) to prepare a statement featuring details of those who the Council consulted; a summary of the main issues that were raised during the consultation; and details of how these issues were addressed by the Council as well as any consequential changes to the SPD.
- 2.2. The public and stakeholders were invited to comment on the SPD during the consultation period. This included all parish councils in and around Fenland, neighbouring district and county councils, local businesses, interest/pressure groups, religious organisations, infrastructure providers and any other body, party or individual that specifically requested to be consulted on the Local Plan. Annex A contains a list of those we consulted.

3. Changes to the SPD

- 3.1. A table below summarises all the comments received and how Fenland District Council responded to the issues raised by these comments. The table also shows any changes made to the SPD as a result of comments received. Where no changes were made, this is clearly explained in the Council's Response column.
- 3.2. The draft SPD was based on the Core Strategy Proposed Submission version (September 2013). The Core Strategy then became known as the Fenland Local Plan due to changes to the planning regulations. Policy LP16 was modified as a consequence of the representations made to the proposed submission version and the discussions that took place at the public hearings during the Examination of the Local Plan. Proposed Modifications made to Policy LP16 and the rest of the policies in the Local Plan were subject to six weeks public consultation. This provided an opportunity for all to comment on the changes proposed to the Local Plan policies including Policy LP16.
- 3.3. As a direct consequence to the changes to Policy LP16, two new policies are included in the SPD. The changes to Policy LP16 have been consulted on as part of the local plan process and as the new SPD policies are providing further guidance on these, it is felt that further public consultation is not necessary.

Consideration of the issues raised by consultees

Please note paragraph numbering has changed between the draft and the final version of the SPD. The section on the consultation process was taken out in the final version of the SPD and this has altered the paragraph numbering. In general, paragraph numbering has been reduced by one section, for example paragraph 3.5 in the draft version becomes paragraph 2.5 in the final version (Note: text in **bold** is new text added and ~~strikethrough~~ text is the deleted text from the draft SPD)

Respondent information	Comments	Council's Response	Change to SPD
COM-1 Highways Agency	"Delivering and Protecting High Quality Environments in Fenland" is the document in question. I can confirm that the Highways Agency has no comment to make on this draft document.	Comments noted	No change
COM-2 Cambridgeshire County Council Historic Environment Team	<p>3.5 Policy DM1 provides detailed guidance on the implementation of Core Strategy policies in relation to the non-designated heritage assets of buildings of local importance.</p> <p>Policy DM1 – Buildings of Local Importance</p> <p>Where planning permission or conservation area consent is required, it will not be granted if it would involve the demolition of, or substantial alteration to the external appearance of, any building designated as of local importance (as set out in Conservation Area Appraisals or as set out on a List of Buildings of Local Importance to be published in 2014), unless:</p> <p>(a) all reasonable steps have been taken to retain the building, including examination of alternative uses compatible with its local importance; and</p> <p>(b) retention of the building, even with alterations, would be demonstrably impracticable; and</p> <p>(c) the public benefits of the scheme outweigh the loss of, or substantial alteration to, the building.</p>	<p>Comments noted. No changes made in response to the comments.</p> <p>However, it was brought to our attention that conservation area consent was abolished and replaced with a requirement for planning permission for demolition of a building in a conservation area. The circumstances in which such planning permission is required and the consequences of failing to apply for it when it is needed will be the same as it applied to conservation area consent in the past.</p>	Delete " or conservation area consent " from the first sentence of Policy DM1.
COM-3	It should be noted that the Core Strategy has yet to	Policy LP16 was modified taking	No change

Gladman Developments	be formally adopted by the Planning Inspectorate and is therefore subject to both major and minor modifications which may change the meaning or indeed the need for Policy CS16. It is for this reason that Gladman feel that the consultation of this SPD is premature and should not be undertaken until the adoption of the Core Strategy.	account of representations made and the discussions that took place at the Examination Hearing. The changes to the policy were consulted on allowing the public and stakeholders to comment on these changes. As the changes to the SPD are as a direct result of the Policy LP16 modifications (and representations received during the consultation period); it is not necessary to re-consult on the changes to this SPD.	
COM-4 Gladman Developments	If the Policy CS16 is amended, then the SPD may in part already be out-of-date as it does not reflect the Core Strategy. Additionally, the SPD will be required to be re-consulted, wasting both time and money.	Policy LP16 was modified taking account of representations made and the discussions that took place at the Examination Hearing. The changes to the policy were consulted on allowing the public and stakeholders to comment on these changes. As the changes to the SPD are as a direct result of the Policy LP16 modifications (and representations received during the consultation period); it is not necessary to re-consult on the changes to this SPD.	No change
COM-5 Cambridgeshire County Council Economy, Transport and Environment	The County Council is aware that the Core Strategy, including Policy CS16, could be subject to change following the District Council's recent Examination in Public (EiP). Nevertheless, the County Council welcomes the draft SPD in providing additional guidance to both applicants and case officers in support of Policy CS16.	Policy LP16 was modified taking account of representations made and the discussions that took place at the Examination Hearing. The changes to the policy were consulted on allowing the public and stakeholders to comment on these changes. As the changes to the SPD are as a direct result of the Policy LP16 modifications (and	No change

		representations received during the consultation period); it is not necessary to re-consult on the changes to this SPD.	
<p>COM-6 Cambridgeshire County Council Economy, Transport and Environment</p> <p>Same comments made by Cambridgeshire County Council Historic Environment Team</p>	<p>(Changes suggested by Cambridgeshire County Council are in bold)</p> <p>3.1 The historic environment is of great importance to the present character and future of the district. The area is steeped in history and the surviving assets, often waterlogged and sealed beneath the fen deposits, are of intrinsic value in themselves as well as providing opportunities for the future. Just outside the western boundary of the district is the Bronze Age settlement preserved wooden avenue and crannog site of Flag Fen, now an archaeology park housing the eight contemporary logboats from waterlogged sites found in 2011 at Must Farm, one of Whittlesey's King's Dyke brick pits. To the east of March is the important reconstructed scheduled monument of the Icenian defended Late Iron Age settlement of Stonea Camp Hillfort, reputedly attacked by the Romans in 44AD. involved in the Icenian revolt of AD47, four years after the Roman Conquest of Britain.</p>	<p>Changes suggested are reasonable as they reflect Fenland's history.</p>	<p>Make changes as suggested. Add text in bold to supporting text in paragraph 2.1.(final version)</p> <p>The area is steeped in history and the surviving assets, often waterlogged and sealed beneath the fen deposits, are of intrinsic value in themselves as well as providing opportunities for the future. Just outside the western boundary of the district is the Bronze Age settlement preserved wooden avenue and crannog site of Flag Fen, now an archaeology park housing the eight contemporary logboats from waterlogged sites found in 2011 at Must Farm, one of Whittlesey's King's Dyke brick pits. 			Roman Conquest of Britain.
COM-7 Cambridgeshire County Council Economy, Transport and Environment	3.2 There are 22 Scheduled Monuments, 850 listed buildings and 10 conservation areas and one Listed Park and Garden in the district. (Listed Park and Garden should be added to this list)	Make factual changes as suggested by the County. Conservation Officer informed us that there were 655 listed buildings in Fenland and not 850 as recorded in the draft SPD.	Make changes to paragraph 2.2 (final version) as below. There are 22 Scheduled Monuments, 850 655 listed buildings, 10 conservation areas and one Listed Park and Garden in the district.
COM-8 Cambridgeshire County Council Economy, Transport and Environment	3.3 The Core Strategy Policies of CS16 criterion (a) and CS18, along with national policy in the form of NPPF, provide sufficient guidance on the protection of designated all heritage assets (such as including listed buildings and conservation areas) in Fenland.	Changes suggested make the aims of this paragraph clear.	Make changes to paragraph 3.3 as suggested by the county as outlined below. ...provide sufficient guidance on the protection of designated all heritage assets (such as including listed buildings and conservation areas) in Fenland.
COM-9 Cambridgeshire County Council Economy, Transport and Environment	3.4 However, a number of buildings have been (and continued to be) identified in Fenland that are considered to be buildings as being of local importance locally distinctive, adding character to the area and are valued by the community. These buildings are not nationally formally 'listed' because they are not nationally important for their architectural or historic interest do not fit the national designation criteria. Nevertheless, these buildings add visual interest to the street scene and define local identity and distinctiveness character. Each building is assessed against locally developed criteria and only those buildings which meet these criteria are included in the list.	Changes suggested are helpful and provide clarity on Buildings of Local Importance.	Make changes suggested (in bold) to paragraph 3.4. Fenland that are considered to be buildings as being of local importance locally distinctive, adding character to the area and are valued by the community. These buildings are not nationally formally 'listed' because they do not fit the national designation criteria. Nevertheless, these buildings add visual interest to the street scene and define local identity and distinctiveness character. Each building is assessed against locally developed criteria and only those buildings which meet these criteria are included in the list.
COM-10	DM4 Waste and Recycling	Additional reference to the policy in	No change

Cambridgeshire County Council Economy, Transport and Environment	The cross reference to the RECAP Waste Management Guide SPD is welcomed. It would be helpful if the SPD added that the Cambridgeshire and Peterborough Minerals and Waste Core Strategy (policy CS28) requires applicants for all development to submit with their planning application a completed RECAP Waste Management Design Guide Toolkit Assessment. This enables the LPA / WPA to determine if adequate provision has been made for sites, and if a contribution for household recycling centre provision is required.	the Cambridge and Peterborough Minerals and Waste Core Strategy is not necessary as developers would need to be familiar with this policy if they are submitting a planning application for waste and recycling facilities.	
COM-11 Cambridgeshire County Council Economy, Transport and Environment	Policy DM5 – Flexible Use and Adaptability In order to satisfy the requirement of criterion (k) of Core Strategy policy CS16, where appropriate, schemes should be designed for flexibility and adaptability, and should: a) provide scope and opportunities through design and choice of building materials to easily adapt the property to the changing needs of their users; and b) have a flexible layout which allows for a variety of possible future uses to be accommodated; and c) include a proportion of homes which comply with the Lifetime Homes Standards or successor standards.	Policy LP5 of the Local Plan seeks all new housing to be of a Lifetime Homes Standards. Adding criterion c) in Policy DM5 is unnecessary.	No change
COM-12 Cambridgeshire County Council Economy, Transport and Environment	A footnote to the Lifetime Homes website (http://www.lifetimehomes.org.uk/) should be included for reference.	Lifetime Homes issue is adequately covered in the Local Plan (Policy LP5). No need to include this in the SPD.	No change
COM-13 S. Beel	I broadly support the points made although I think section 6 on local distinctiveness could emphasise the need for new development to be of a scale (ie height of buildings), design and materials which are sympathetic to existing buildings and traditional fenland housing.	Paragraph 5.1 of the SPD (final version) includes 'relationship to surrounding development' and 'materials' as some of the elements that make up high quality design.	No change
COM-14	But the main omission is any mention of orchards in	Policy DM2 seeks retention and	No change

S.Beel	section 5 on natural features. This is one of the most significant features of the traditional (if not natural) landscape and is fast disappearing. It is really important that old orchards are protected.	protection of natural features (see criterion c). Orchards around Wisbech are specifically mentioned in paragraph 4.2 (final version) as an element of local distinctiveness worthy of retention.	
COM-15 English Heritage	Policy DM1 and the commitment to creating a list of buildings of local importance is welcomed. The wording of Policy DM1 should follow the approach of the NPPF and be compliant with Policy CS18 of the Core Strategy.	Support for Policy DM1 is welcomed. The Council feels Policy DM1 follows the approach of the NPPF and is in accordance with Local Plan Policy LP18.	No change
COM-16 English Heritage	Policy DM3 on local distinctiveness is reasonable in terms of the historic environment - it would be enhanced by further guidance on what defines local distinctiveness in Fenland and further advice on how to deal with specific types of development (e.g. extensions, shopfronts etc).	Comments noted. Further design guidance may be produced in the future if it is considered necessary.	No change
COM-17 Middle Level Commissioners	Policy DM2 – Natural features and landscaping schemes We would encourage the retention of “drains”, care is needed with this description as it has many meanings, and other water bodies.	Comments noted. Drains mentioned in this policy (criterion c) are in the context of preserving natural features and not as means to control flooding.	No change
COM-18 Middle Level Commissioners	Policy DM3 – Making a positive contribution to local distinctiveness and character of the area. We note the contents of this policy, particularly item (e), but would consider that they are, in general covered by other policies. A simple reference to your Councils SFRA, policy CS14 and/or other relevant policies may be all that is required.	Comments noted. The policy is encouraging use of high quality design so that it is able to withstand the impact of climate change and not just managing the risk of flooding. It is necessary to include this criterion in this policy.	No change
COM-19 Middle Level Commissioners	Policy DM6 – Mitigating against harmful effects We note the contents of this policy, particularly item (f), but would consider that they are, in general covered by other policies. A simple reference to your Councils SFRA, policy CS14 and/or other relevant policies may be all that is required.	Criterion (f) of Policy DM6 deals with various types of pollutions that could have adverse impact on human health and safety. A simple reference to the Council’s SFRA and Policy LP14 would not address these issues.	No change
COM-20	The contents of sub-section 13.3 is incorrect. Nearly	The content of paragraph 12.3	No change

Middle Level Commissioners	all the drinking water used in your Councils area is imported from outside the district. In summary these are the north of the district which are served by Fenland WRZ, that is supplied by groundwater (via boreholes) in the Chalk aquifer in West Norfolk, with the remainder served by the large storage reservoirs (Rutland, Grafham, and Pitsford) within the Ruthamford WRZ. These are filled by abstraction from the Rivers Nene, Welland and Great Ouse.	(final version) discusses the benefits of high quality water environment and its benefits to the community both in physical and psychological terms. While it may be correct that all the drinking water is imported this is not the issue discussed in this paragraph.	
COM-21 Middle Level Commissioners	We note the contents of the last sentence of subsection 13.6, which reads: “The Anglian RBMP includes maps which show present water body status, pressures and current reasons for failure [in respect of the WFD] and the Environment Agency are able to assist in the interpretation of this evidence.” Unfortunately, this is not our experience as we still await guidance on landing stages/moorings in respect of the WFD.	We discussed these comments with Environment Agency and it was suggested minor additional wording in this paragraph will overcome Middle Level Commissioners concerns. Additional text in bold.	Add text in bold to last sentence in para 12.6 (final version) The Anglian RBMP includes maps which show present water body status, pressures and current reasons for failure [in respect of the WFD] and the Environment Agency are able to assist in the interpretation of this evidence and sign-posting further relevant local catchment information.
COM-22 Middle Level Commissioners	DM 7 –Riverside settings As the country's fourth largest navigation authority, the Commissioners are pleased to note the inclusion of this draft policy. As such we are a statutory consultee on such issues and generally promote the use and enhancement of our navigation system, particularly on the Nene-Ouse Link Route (Kings Dyke – Whittlesey Dyke – Old River Nene – Well Creek) which includes both March, Benwick and Whittlesey, whenever possible provided that they do not detrimentally affect our statutory water level/flood risk management functions.	Comments noted. Policy is now DM8 in the final version of the SPD. But the wording of Policy DM8 has not changed.	No change
COM-23 Middle Level Commissioners	(a) As stated above, the Commissioners will generally promote the use and enhancement of their navigation system and do not object to small infill developments, say up to 3 houses, within the extent of the existing urban boundaries, and the	Development along the river, as with any development, will need to comply with Local Plan and any other relevant policies in operation at the time of a planning	No change

	replacement of existing properties, but they will not permit under their byelaws new 'ribbon' development alongside any of their watercourses.	application.	
COM-24 Middle Level Commissioners	(b) Agreed.(Policy DM7)	Noted (Policy DM8 in final version)	No change
COM-25 Middle Level Commissioners	(c) Any works within a Middle Level watercourse or its associated 20m wide maintenance access strip requires its prior written consent and, in this respect, we promote pre-application consultation as this enables any issues to be dealt with prior to and not during the decision making process. This process is likely to require the provision of a Flood Risk Assessment, in respect of the Commissioners byelaws as opposed to fulfilling any development control requirements, to ensure that the proposal does not increase the risk of flooding by detrimentally affecting the Commissioners system. Neither the Developer nor your Officers/Members should assume that consent will be given.	Comments noted. Internal Drainage Boards are consultees on all planning applications in their area and in particular those affecting waterways. Any comments made by the Internal Drainage Boards will be fully considered during the decision making process.	No change
COM-26 Middle Level Commissioners	(d) Whilst the Commissioners would encourage the principle of the increased ecological value of and navigation on our watercourses the ability to maintain such assets for their intended water level/flood risk management use must be considered. Experience has shown that biodiversity can be supported within the engineering framework of essential maintenance operations but care needs to be taken to ensure that a water level/flood risk management system does not suffer because of 'green' issues.	The purpose of this criterion is to reduce impact of development on the natural environment. This should not prevent any essential maintenance that is needed for water level/flood risk management.	No change
COM-27 Middle Level Commissioners	(e) We are uncertain what is meant by "opportunities are taken to enhance the extent of the network." If this is a reference to the 'Fens Waterways Link' or similar projects the extent to which the Commissioners will support these has yet to be determined. The Commissioners do not accept the figures for increased activity and tourism presented	Comments noted. It is the desire of this policy to make efficient use of the natural resources. Where it is appropriate, this could mean extending the existing network or providing facilities that could increase the use of the rivers	No change

	for its area in the original Bullens' project report.	without affecting them adversely.	
COM-28 Middle Level Commissioners	(f) The Commissioners' policy is not to permit on-line moorings for residential use as this has previously caused issues with effluent disposal directly into the watercourse, anti-social behaviour and bank maintenance issues. Careful consideration would therefore need to be given in respect of Council inspections, and where necessary enforcement action is required. In addition any such moorings would need be in accordance with respective navigation authorities guidance and meet the objectives of the WFD and be in a sustainable location.	Comments noted. Internal Drainage Boards are consultees on all planning applications in their area and in particular those affecting waterways. Any comments made by the Internal Drainage Boards will be fully considered during the decision making process.	No change
COM-29 Middle Level Commissioners	(g) In respect of water supply and "waste" disposal these should be via the existing facilities within our system including your Councils sanitation point in March. For reasons of health and safety, the Commissioners are unlikely to consent the provision of electricity to moorings.	Comments noted. These issues would be discussed during the detailed planning application stage and therefore do not need to be discussed in this SPD.	No change
COM-30 Middle Level Commissioners	(h) In respect of the Commissioners watercourses these would also be subject to our byelaws.	Comments noted	No change

4. Changes to SPD resulting from amendments to the Local Plan prior to its adoption

Change to Local Plan Policy LP16	Change to SPD
<p>Amend criteria (c) to read:</p> <p>"retains and incorporates natural and historic features of the site such as trees, hedgerows, field patterns, and drains <u>and water bodies.</u>"</p>	<p>Minor change to policy but no alteration to SPD required.</p>
<p>Amend criteria (l) to read:</p> <p><u>"Identifies, manages and mitigates against any existing or proposed risks from sources of noise, emissions, pollution, and contamination, odour and dust, vibration, landfill gas and protects from water body deterioration."</u></p>	<p>Changes to policy but no alteration to SPD required as the general thrust of the policy remains the same.</p>
<p>Insert new criteria (m) to read:</p> <p><u>"the site is suitable for its proposed use with layout and drainage taking account of ground conditions, contamination and gas risks arising from previous uses and any proposals for land remediation, with no significant impacts on future users, groundwater or surface waters."</u></p>	<p>New criterion introduced. New policy (DM7 – Contaminated Land) and supporting text added to the SPD.</p>
<p>Insert new criteria (o) to read:</p> <p><u>"does not result in any unreasonable constraint(s) or threaten the operation and viability of existing nearby or adjoining businesses or employment sites by introducing "sensitive" developments."</u></p>	<p>New criterion introduced. New policy (DM9 – Sensitive Development) and supporting text added to the SPD.</p>
