

INDIVIDUAL SCHEME WISBECH BUS STATION

Option BS1A – A new bus station access from Nene Quay

WHY THIS SCHEME IS PART OF THE WISBECH ACCESS STRATEGY?

- The access out of the bus station is directly onto Freedom Bridge roundabout. For a number of years now the bus operators have informed us about difficulties getting onto the roundabout. This is affecting the viability of existing bus services
- The size and shape of the bus station restricts any further growth or changes
- Possible conflicts with other users. In previous years this has been a significant issue. The most recent bus station scheme has made improvements but the limited space introduces a compromise. There may be a greater opportunity as part of bigger scheme to further reduce possible conflicts

BENEFITS OF THE SCHEME

- The bus station remains in its current location
- There are no changes needed to bus service routes
- The bus station remains within 200m walking distance of the Town Centre
- Provides additional layover bays for buses
- Provides a new entrance to the bus station with a signalised bus priority junction
- There are no changes to the existing taxi rank
