

INDIVIDUAL SCHEME

SOUTHERN ACCESS ROAD

SAR1 – Southern Access Road linking New Bridge Lane and Boleness Road

WHY THIS SCHEME IS PART OF THE WISBECH ACCESS STRATEGY?

- This project is about creating a Southern Access Road by upgrading New Bridge Lane and Boleness Road
- There are limited east-west vehicle routes across Wisbech. The transport evidence base for the Fenland Local Plan indicated that an additional east-west connection was very likely to be needed
- This element of the study is closely linked to the performance of Cromwell Road and Elm High Road

BENEFITS OF THE SCHEME

- Provides additional east-west connectivity across Wisbech
- Helps to reduce congestion on the network
- Help to alleviate pressure on Weasenham Lane
- Provides access to the Wisbech South Local Plan development site
